- Stylish • Elegant Design
- Energy Efficient • Durable

Control Your Environment, Privacy & Comfort
with the **NEW** innovative **Slidetrack**[®] **Blind**.

Proudly Australian designed and manufactured.

Shade & Privacy

Slidetrack® SunScreens provide effective shading and screening solutions for commercial and residential applications.

Stylish

Slidetrack® Blinds are designed to be unobtrusive and present clean functional lines. With our wide colour range, our shades will complement the appearance of your property.

Simple Design

One-handed operation with a central locking position means **Slidetrack® Blinds** are a breeze to use. No ropes, pulleys, zippers or straps. The fabric is held in tracks on both sides and a sealing strip or valance at the bottom helps keep insects out. Intermediate locking positions are easily provided.

Strong & Durable

The bottom bar is firmly located within the side tracks resulting in a strong design without wear marks. Exposed parts are made from stainless steel and aluminium. And with the screening fabric held securely in the side tracks, there is no need to keep the sheet tightly stretched.

Café Blinds

Made with clear or tinted PVC, **Slidetrack® Café Blinds** are ideal for creating a cosy environment while maintaining an open feel.

Motorised Option

Slidetrack® Blinds can be fitted with a hand crank or motorised if required.

SunScreens Café Blinds

Slidetrack® Blinds' unique fabric guide system maintains perfect tension.

Locking pins are centrally located and intermediate locking positions are easily provided.
